

Merlinus Anglicus Junior:

O R, T H E

STARRY MESSENGER.

For the Year of our Redemption, 1710.

Being the second after ~~BISSEXILE~~ or Leap-Year

Wherein is Contained both *Astronomical* and *Metoro-*
logical Observations, with the State of the Year deduced
according to Art, from the Solar Ingresses, Eclipses, various
Configurations, Aspects and Conjunctions of the Planets,
The Rising and setting of the Moon, and Time of High-
Water at London-Bridge, a Table of the Kings and Queens
Reigns. A Perpetual Table of Sun-Rising and Setting, Break
of Day, Twilight, and Length of the Days, to every fifth
Day throughout the Year. Also a Plain and Easy Table of
Interest, and another shewing the Bearing, Distance, Long-
est Day and difference of Meridians of most Principal Ci-
ties in the World, from the City of L O N D O N. To-
gether with a Table of Houses, according to the Doctrine of
PTOLEMY, the like not to be found in any other for Ex-
actness, with all other Necessaries fitting for such a Work;
Accommodated to the Meridian of L O N D O N, which
lies in the Latitude of 51 Deg. 32 Min. North, but will
serve for any part of Great-Britain, or Ireland. To which
is added, Monthly Observations, and Predictions for the
whole Year, the like (in all Particulars) not Extant, &c.

By HENRY COLEY Student in the
Mathematicks, and the Celestial Sciences

will behold the Heavens, even the works of thy Fingers, the Moon
and Stars which thou hast Ordained, Psal. 8. 3.

L O N D O N Printed by E. Bockingham, for the
Company of Stationers. 1710.

A perpetual TABLE of Sun-Rising and Setting
Length of Day, and Break of Day.

The Use and Explanation of the foregoing Table of the Pleiades, or Seven-Stars.

THE Table of the *Pleiades*, or *Seven-Stars* Contains Twelve Columns; the First towards the Right-Hand Expresseth every Fifth Day of the Month, as 1, 6, 11, 16, 21, &c. And the Second shews their Rising in Hours, and Minutes. The Third their Southing. The Fourth their Setting, as plain by their very Titles; and herein you are to Observe the Letter (a) signifies Afternoon, and the Letter (b) Beforenoon, or Morning, and so likewise in the 5th 6th and 7th Columns the same, and also in the 8th and 9th and 10th, which is Plain to the Meanest Capacity, as for

Example.

Suppose you desire to know the Rising, Southing, and Setting of the *Pleiades*, or *Seven-Stars*; On *January 21* I find they Rise 10, (b) 16, which shews they Rise at 10 of the Clock, and 16 Minutes past before Noon, as the Letter (b) at Top notes, they are South the same Day, at 6 (a) 32, that is at a Clock, and 32 Minutes past in the Afternoon, as the Letter (a) at the Top signifies in the Second Column, and in the Third Column, you will find they Set the same 21st of *January*, 2, (m) 48, which is 2 a Clock, and 48 Minutes past, signified by (m) by which Letter is meant Morning; again on *February 21*, they Rise at 8, and 15, Minutes past before Noon South at 4, and 30, Minutes past in the Afternoon, and Set at 12, and 46, Minutes past in the Morning; again, *March 21*, they Rise at 6, and 31 Minutes past in the Morning, South at 2, and 47 minutes past in the Afternoon, and Set at 11, and 3 minutes past in the Afternoon, or Night, and so of all the rest of the Months, which is both Plain and Easy to the meanest Capacity, and of great Use to the Honest Country-man,

Advertisement.

Mr. *Bateman's* True Spirit of Scurvy-grass, both Golden and Plain, for their Vertues in curing the Scurvy, Dropsy, and many other Distempers, only truly prepar'd by me *Rob. Smith* at the Sign of Mr. *Bateman's* *Pauls-Chain*, near *Dockers Commons*, where they are Sold, and at other places mentioned in my printed Bills, price each Bottle, 1 s. The said *Rob. Smith* is also the great Balsamick, or Health-procuring Pills, approved by the most eminent Physicians in *England*, to be one of the most safe and pleasant Purgatives in the World. Their Vertues are set down in a Printed Sheet given with the Price 1 s. the Box.

A plain and easie Table of simple Interest at Six Pounds per Cent.
from Five shillings, to a Thousand Pounds; and to avoid Fra-
ctions it is fitted to the meanest Capacity, as near the Truth
as possible.

Anne Born Feb. 6. 1664-5. Proc. Mar. 8. 1701-2. *Whom God prefers.*

God Bless Queen Anne, and send her long to Reign,
In Peace the Gospel Rights, still to maintain
That neither Popish Fops, nor canting Crew,
May undermine the Church Ancient and True:
And when She leaves this Earthly Throne may She,
In Heaven with Angels high Exalted be.

Cosmographical-Astronomical Propositions of Good uses (1)
the Equinoctial Circle, parteth both the Cælestial and Terrestrial
Globes into Equal portions, is divided into 360 Degrees as every
great Circle or lesser, by reason of the Facile Division of the
Number into a Moyety, a 3d. 4th. 5th. 6th or 8th its 6th
part being 60 admits of many more Divisions, &c.

Observations.

We are now by the Blessing of God *Arrived* to the Year 1710; which produces some *healing Aspects*, things now seem in better Posture than in some Years past, all things tend to Peace and Quietness, and we are in hopes the Grand Disturber of *Europe* has his Nails so par'd, that he will never be able to disturb its Quiet any more. God Bless the Queen and Parliament of *Great Britain*, and Grant they may always study the good of these Kingdoms. Some Tricking Clerk meets with a Frown, the common People now are in some hopes of seeing better Days, and a Prospect of Trade at hand. Now those that shew'd their Teeth when they thought Calamity was near are like Mum Chance.

February hath XXVIII Days

(2) The Equinoctial, when the Sun is therein posited makes the Days and Nights even, and divides the Sphere into the Northern and Southern Hemispheres, whose Poles are the Poles of the World, 15 Degrees of this Circle hourly rise on the one part, and as many on the other hourly set, so that one Degree Riseth Every four Minutes, &c.

Observations

This Month affords us three Squares, one of the Sun and Jupiter, another of Saturn and Venus, and another of Jupiter and Mars, as also a visible Eclipse of the Sun about Noon, this will raise Feuds and Animositities among Men and a Giddy brained multitude, Plotting and contriving to no purpose. This Eclipse happens in the latter end of the first, and touches upon the beginning of the second Face of Pisces, which as Authors say denotes the drying up or draining of Rivers, and that the Sea-coast shall be unfortunate, and Death to some Excellent Man, with Destruction, and wast of Fish near the Sea Towns, and Earthquakes in some places, and an Eminent Church-Man call'd in Question.

March hath XXXI Days.

(3) This Circle shews the Equinoctial Points which happen Twice in a Year; at the Suns Entrance into Aries and Libra it divides the Zodiac in two Moyeties, the South and North, and thence the Signs are distinguished into North and South; it is the measure of time, and shews what Declination the Stars or parts of the Ecliptick have either North or South, &c.

Observations.

Now things lye hush and seemingly in a very peaceable condition, yet the Square of the Sun and Saturn, gives uneasiness to some Person of Note, and the Conjunction of Mars and Mercury shews some Villany will be discovered about the Coin, or some fly Cheats or Tricking in the World, let the Actors, be rewarded according to their Merits.

Now a Peace I suppose might be on Foot, which I hope will be accomplished in good time, but let not the Confederates make more hast than good speed, but keep a watchful Eye, Remembering the Trick last Year, some good News from abroad to the Satisfaction of the Industrious Merchant who in a little time I hope will cross the Seas without Fear of being infested by the Grand Thiet of Europa.

Then
*Tranquillus rebus cauto
quaerit Adversa.*

In Prosperity beware of things that are Adverse.

April hath XXX Days

Moreover in the Equinoctial are observed the Ascensions and Descensions of the Zodiacal Signs (4) a Line perpendicular to the Meridian Line, represents the Equator, and so on the contrary, which yet may be described without the Meridian Line if a right Line be drawn from a stile or Gnomon by the Points of the Shades Extremity.

This Month seems to bring matters in good order and the Friendly Rays seem to denote no less, yet the Square of Saturn and Mars, will cause some uneasiness, and things in a little time, to turn rather to violence than otherwise, and some Roguish Trick acting, for which the Actors I hope will meet with a just Reward. Much grumbling and repining among a crew of dissatisfied People, who will never be quiet with Peace, nor without it, &c

The Extraordinary Method for making Spectacles approv'd by the Royal Society, and best skill'd in Opticks, to be ground to the greatest perfection; all sorts of Concave Glasses, and Prospects, particularly for short sighted Persons, Telescopes for Day or Night, magnifying and multiplying Glasses, Weather Glasses, Triangular Prism's Concave, Burning and Locking Glasses, speaking Trumpets, Convex Lanthorns, Reading Glasses of all sizes, and all other sorts of Glasses after the truest method, at the Golden Spectacles, by the Sun Tavern behind the Royal Exchange London.

By Thomas Gay.

May bath VXXI Days

On the Day of the Vernal or Autumnal Equinox, for the Altitude of the Pole being given, the Altitudes of the Equinox likewise given, as being the Compliment of the Quadrant of Circle; as for Example, the Altitude of the Pole at London is 52 there for the Altitude of the Equinox and consequently the Sun in the first Degree of Aries or Libra is 38 -- 28.

This Month is usher'd in
 with a hopeful Conjun-
 ction of Saturn and Mercury,
 in Cancer, some fly trick
 acted in Scotland, neither
 is Holland free; some part
 of Burgundy under affliction;
 Bern seems uneasy, and ma-
 ny other Places at this
 time in Doubts and Fears.
 Jupiter in opposition to
 Mars, will stir up Fights
 between the Crown and
 Sword, much turning and
 shifting, sometimes one
 sort of News, and some-
 times another; so that the
 People suspect when they
 hear the Truth, and are
 very fond to believe a ly-
 ing Report, if it make for
 the Interest of the Cause
 they favour, &c. yet I
 think no true English Man
 will be fond of a French
 Yoke, or Wooden-shoes.

July hath XXXI Days

(5) The Equator in a right Sphere, passes by the Zenith or Pole of the Horizon; in a Parallel-Sphere, it is coincident with the Horizon, and is the Horizon it self; in an Oblique-Sphere, it makes Acute-Angles with the Horizon; and in a Right Sphere it makes Rect-Angles; in which position of the Sphere, all the points of the Heavens daily Rise and Set, excepting the Poles of the World:

[illegible]

Now in this Month of July, many Grave and Wise heads at Work, many Negotiations on Foot, in hopes to finish a firm and lasting Peace in Europe, which I doubt not, if this Month does not accomplish it, in a little time it may, to the satisfaction of all the Allies; and I think *Septemb.* will not pass over before all be compleated; and every Prince have satisfaction for the wrong he has receiv'd, from a cruel and bloody Tyrant, who cou'd not rest contented with the blood of his own Subjects, but he endeavour'd to be a Universal Monarch, and enslave all his Neighbours; but blessed be God, that has given *English-men* better Hearts, than to be Slaves under a *French Yoke*; so that he may now cry, *Periculosa Temeritas.* Rashness is dangerous, &c.

B 3

August hath XXXI Days.

Wherefore to the Inhabitants in a Right Sphere, there
 perpetual Equinox, a double Summer, and double Winter
 and different Meridian Shadows; to wit, sometimes North
 and sometimes southern; hence they are called *Amphiscia*
Amphitropica, which happens likewise to those in an oblique
 Sphere, whose vertex is between the Equator and one Tropick.

The square of the *Sun* and *Jupiter*, and that of *Jupiter* and *Mercury*, also will make some uneasiness among mankind, yet things seem to tend towards a Peace, for the Superiors keep within Orbs of a hopeful Time, which we may hope will set all to rights in a little time. I cannot chose but touch upon the gentle String, which Tunes Peace to the World, and notwithstanding the great Bluster made last Year about it; yet I could never venture to speak one Word of it, till now; and if it comes sooner than I have hinted, I shall be glad to be mistaken in the time, with all my heart, for the good of my Fellow-Creatures; that the Sword so long drawn and brandished, in a long and tedious War, may be sheathed for a long time, that Peace and Plenty may abound, &c.

B 4

September hath XXX Days.

(6) In an Oblique-Sphere, whose Vertex is in one of the Tropics, the Equator is raised 65 Degrees, and half, and consequently the Pole 23 and a half, and the Polar Circle is always Latent. The Inhabitants of this Sphere have one Summer and one Winter, and one and the same Meridian Shadow, (That is, a few)

Archeologische
Ausgrabungen.

Notwithstanding all the
 successful Endeavours to
 procure a firm and last-
 ing Peace, many uneasy
 Spirits are at work, and
 fear that the end of the
 War will create a Trade
 for the Hangman; many
 that have made but an ill
 use of their time, will still
 have to ride a Cock-horse,
 till a Halter stops their
 Career; now some good
 Men from abroad, and
 the come of Jupiter, to Sa-
 turne, and Mars on Conjun-
 ction, will, I hope, fix all
 in a firm and found foun-
 dation; and better, I hope,
 than the Peace of *Relwick*,
 which the Allies have so
 severely paid for since,
 (tho' some of you may say)
 than the Peace of *Utrecht*;
 Peace; now some fada-
 lions will be sent
 abroad for which hope
 the Promoters will meet
 with a reward far more
 to their Merit.

Eng. Account: Always to the North, under the Northern, always to the South, under the Southern Tropick, thence call'd *Heterosphaera* or *Alteriumbra*; these three Spheres, that is to say the Right and the two Oblique, are in the Torrid Zone, which is terminated by either Tropick, and which the Equator cuts in the middle, as the Ecliptick does the Zodiack.

Now things seem to tend
 to Peace and Quietness,
 and we have Ground to
 hope, a lasting Peace may
 be concluded, to the great
 Joy and Satisfaction of all
 Europe, tho' the Sun and
 Saturn square, may cause
 some Fruits and Thwart-
 ing, and the square of the
 Sun and Mars, as now pos-
 sessed, will give uneasiness,
 and some will be apt to
 affront Majesty it self, and
 the square of Mars and
 Mercury, will set some Vil-
 lany on the Stocks, which
 before it be finished, may
 be blasted to the Disgrace
 of the Actors.

Now the Parliament of
 Great Britain, will begin
 to act something for the
 good of these Kingdoms,
 and the further Union of
 a Neighbouring Kingdom,
 may be thought of, &c.
 and then a flourishing time
 for Trade follows.

(7.) In an Oblique-Sphere, whose Vertex is in the middle between the Tropick and the Polar-circle, the Equator and the Pole, have both equal Elevations of 45 Degrees; hence the heat of the Summer is as great as the cold of the Winter; the higher the Equator is, the greater the heat, and the cold more intense, by how much the Pole is more elevated.

Now the Councils of di-
vers Nations are at Work,
and it is hoped to a good
End. The Trine of the
Sun and Saturn, may ad-
vance some grave Senator,
but his Preferment comes
on but slowly. Indeed,
the Conjunction of the Sun
and Jupiter must certainly
elevate some Gown-man to
extraordinary Preferment,
either in Church or State,
if not both.

Some fly Villians will be catch'd napping, when perhaps, saying they are sorry, will not serve their turns: Some hope, some fear, and some do cry again, Halts for Thieves, Horser for Gentlemen; some good News may be expected near this time; tho' some Ships at Sea, may be in danger.

December hath XXXI Days

But in an oblique Sphere, whose vertex is in a po
Circle, the Equator is elevated 23 deg. and a half, and
Pole 66 Degrees and a half, and the length of the great
or longest Day, is 24 Hours, by which the temperate Z
is terminate towards the Pole, as it is towards the Equat
by the Tropic.

This is the last Month,
 and the shortest Days, and
 as concludes the Year, it
 is hoped the close consul-
 tations thereof, will be
 very hopeful, and tend to
 the lasting and firm Peace
 and Tranquility in Europe,
 for all the Aspects of this
 Month, tend to nothing
 but Peace and Tranquility,
 with a good understand-
 ing between Man and Man;
 so now all things seeming
 to harmonize so well, and
 the blessed time drawing
 near, when the Lord of
 Life was manifested in the
 flesh, to destroy the Works
 of the Devil. I hope those
 that have Store, like good
 Stewards, will feed the
 Poor, remembering it was
 and is still in Gods Power
 to alter the Scene, and
 raise the Beggar from the
 Dunghill, and bring down
 the proud and lofty Spi-
 rit; and thus I end, with
 God preserve our Gracious
 Sovereign Lady Q. Anne.

The Designation of the Moon in MAN's Body, passing under the Twelve Zodiacal Constellations.

♀ Arms and Shoulders
 ♀ Heart and Back
 ♀ Reins and Loins
 ♀ Thighs
 ♀ Legs
 ♀ The Feet.

The Characters of the Seven Planets.

♄ Saturn, ♃ Jupiter & Mars, ♀ Venus, ☿ Mercury, ☾ Luna, ☉ Dragon's Head, ☿ Dragon's Tail.

Upon the Twelve Signs.

♀ THE Princely Ram, glittering in Golden Wool,
 ♂ Wonders to see the backward rising Bull
 ♀ With Submiss Looks, beckons the Twins next whom,
 ♂ Cancer who after him sees Leo come;
 ♀ Him Virgo follows, then the Scales that weigh
 ♀ In even Ballance, equal Night and Day.
 ♀ Draw on the Scorpion with his Fiery Sting.
 ♀ { At which the Centaur, with's shaft Levelling.
 ♀ Seems ready to let fly; so these come on
 ♀ The Goat's contracted Constellation.
 ♀ Aquarius next pours from his Urn a Flood,
 ♀ While the glad Fish to the lov'd Waters feed.

The Second Part of COLEY, for 1710.

the Creation, and since Noah's Flood,
the (sure) was ne'r well understood,
their accounts do so much disagree,

They cannot well be reconcil'd by me:
"But what seems probable to bear true date,
"Shall here succeed as Chronicles relate.

Willia. Duke of Normandy
Conquer'd England. 645

Bridge built with Stone 521

First Mayor of London 519

Plague in London, of which
died 30598 107

Powder-Plot, Nov. 5. 105

Plague in London, of which
died 35418 80

of Strafford Beheaded, 70

Flight, October 23d. 68

ford Fight 68

Moore Fight, Jul. 2. 66

Fight, in Sept. 65

Fatal Battel, June 14 65

Laud beheaded, Jan. 10. 65

Charles the I. murdered, 30. 1648. 61

Fight, Sept. 3. 59

died, Sept. 3. 51

Monk marched to 51

Charles the II. Return'd, 29. 50

and the rest of his 50

executed at Charing- 50

Charles the II. Crown'd, 42

COLE-Y's *Astrological Observations*, 1710.

Of the Eclipses this Year, 1710.

THIS Year produces Four Eclipses, (*viz.*) Two of the Sun, and as many of the Moon; and are as follows,

The First is a visible Eclipse of the Moon, on the Second Day of February, the beginning will be about 5 minutes past 9 at Night, and near 10 parts of 12 of the Moon's Body will be Obscured from our sight, on the lower side of the Moon's Body. This Eclipse happens in the last face or decanate of Leo; shews much Discontent among People, who will be inclin'd to Novelties, and desirous of New Laws, and where Armies are, it excites them to New Actions and Attempts.

The Second will be a visible Eclipse of the Sun, on the Seventeenth Day of February, near Noon. This is also visible; it will continue near Three Hours, and about 8 parts of 12 of the Sun's Body Obscured on the South side. This Eclipse happens in the latter end of the first face of Pisces; this, Authors tell us, brings Sadness, and a kind of a Melancholy Fit on Priests, and on those termed Religious Houses: and as it enters the second face, before the Eclipse is over, so it also does threaten Death or Calamity to some Great Person.

The Third is an Eclipse of the Moon, but Invisible, on July 28. about Ten of the Clock in the Fore-noon.

The Fourth and last is of the Sun, on August 13. about 10 in the Evening, but the Moon having great South Latitude will not be seen in England; and thus much for the Eclipses of this Year.

On July the 14th. this Year, happens a Trine of Saturn and Jupiter; and also they meet again in Trine the 21st. day of September; which makes five times these Planets have been in Trine Aspect since the 19th. of December, 1708. like not having happen'd in 100 Years, which undoubtedly will bring Peace and Tranquillity to Europe, &c.

COLEY'S *Astrological Observations*, 1710.

Of the Four Seasons of the Year.

NOW God Preserve the QUEEN, let all Men say,
Since Britain's Ports replenish'd are with joy;
Now boast thy self, amidst thy Towering Pride,
Thy Ebb's Transform'd into a flowing Tide,
Of Mirth and Gladness, Prais'd be God, I say,
Who turn'd our Night into a Sun-shine Day.
What if the Almighty had stretcht out his hand
To scourge Impiety within the Land,
And Raz'd our Walls with flat Confusion,
With Civil Broils, and proud Rebellion;
Then had our Famous Cities gone to wrack,
And every Town been Subject to the Sack;
Then would the Mother Dread her Dreadless Child,
And spotless Virgins would have been defil'd;
And thou (O London) to thy extream Pain,
Would'st extream Misery and Loss sustain:
Then hadst thou languish'd in great Confusion,
Spilling of Blood unto extream Effusion;
But now *Great-Britain*, Jove has full decreed
To send thee succour at all times of Need;
Shrowding thee under his all-covering Wing,
And still Protecting thee from Sorrows sting:
Be grateful therefore to his Sovereign Might,
Who held held thee always precious in his sight.

& Two incomparable Remedies to be had at Mr Coley
at the Gold-Ring in Little Shear-Lane by Temple-Bar; the
first a Fragrant Water for outward Uses, not in the least
Repelling, being a certain, safe and immediate Cure for the
most Inveterate Itch, Scab, or Leprosy, or any breaking out
of the Skin, altho' most other means, as Purging, Bleeding
&c. have proved ineffectual. 2 s. a Bottle. The other
a Lenement for the Piles, which never fails to Cure, and cer-
tainly prevents those ill Consequences of this Disorder, as
Fistula's, &c. often got by Neglect or bad Cure; it quick-
ly eases the Pain, and dissolves the Swellings in a few times
sing. Price 18 d. a Pot, with Directions.

The Winter Quarter.

This is the most Melancholy Season of all the Year, and takes its beginning at such time as the Sun touches the first Point of the *Cæstrial Goat* or Sign *Capricorn*, or the Earth *Cancer*, which you please, it matters not, and is on *December 11th. 1709.* at 11 min. past 10 a Clock at Night, at which time we have 10 degrees of *Virgo* ascending, and 4 degrees of *Gemini* on the Mid-Heaven; *Saturn* is in *Cancer* in the Tenth, but on the Cusp of the Eleventh Retrograde, and *Jupiter* separating from a Trise of him under the Earth; *Mars*, *Venus* and *Mercury*, are also all under the Earth, which will cause close Consultations this Quarter, and tho' some hopes of a Peace, or such a thing talk'd of, yet the Allies will be very cautious how they trust the Old Tyrant: This ensuing Year undoubtedly will produce a Peace. *Mars* is in *Sagittarius* in opposition to the ascendant of *London*, God preserve that City from Fire both this Quarrer and for ever, for he is applying to the opposition of the *Bulls Eye* a Fiery Star of his own Nature; and as this is the dullest Quarter of the whole Year, and things seem to lye hush, yet the Grandees of Nations are at work, contriving how to get clear of a tedious War, and settle a firm and lasting Peace in *Europe*, which can never be expected till the Grand Disturber is brought to such Terms as may keep him within Bounds, and curb his Ambitious Spirit, for you see in a late Treaty how he wou'd have trick'd the Confederates, as the Wolves did the Sheep, which according to the Fable is thus,

'Upon a Treaty for quieting old Grudges between the Wolves and the Sheep a Truce was made, and Hostages delivered; the Wolves gave their young ones, and the Sheep their watchful Guard of Dogs: the innocent Sheep suspecting nothing, were quietly feeding, when on a sudden the young Wolves growing hungry, and missing their Dams, set up loud and violent Howlings; the old Wolves, who watch'd for a Signal, rush in upon the harmless Flock, and exclaiming on the Sheep for perfidious Truce-breakers, fall upon 'em, whorry and slaughter 'em, being deprived of their usual Guard the Dogs.

COLEY'S *Astrological Observations*, 1710.

The Moral.

Never part with the Means of your Defence and Safety, to
known Enemy, on no pretence of Treaties and Reconciliations
specious sever; to ask it is unfair, to grant it is most foolish.

Suspect an Enemy, tho' reconcil'd,
He may be still a Foe, and you beguil'd;
Quit not your Guard and Arms, on no pretence,
Nor leave your Riders naked of Defence.

And then there is no Danger of being out-witted by that great
Tyrant who styles himself the most Christian King, tho' he has
not one spark of Christian Vertue in him; for he that makes
no Conscience to keep neither Promises nor Sacred Oaths,
never to be trusted: And thus ends this cold, dull and Melancholy
Quarter, and makes room for the next, and is called

The Vernal or Spring Quarter.

Which commences at such time as the Sun touches the first
Point of Aries; or the Earth Libra, being usher'd in
with the coming of the Swallow, Wag-tail, and Barley-Bird
when the honest Country-man begins to sow his Barley: Nor
comes the Cuckow, and Nightingale, and Plants and Flowers
begin to spring and adorn the Fields, this happens on March
at 12 h. 12 m. p. M. or the 10th. day at 12 minutes in the
Morning, at which time there is 6 degrees of Sagittarius
ascending, and 4 degrees of Libra on the Tenth House: Saturn
is posited in the Eighth in Cancer; Jupiter behind the Cusp
the ascendant near the Scorpion's Heart; a violent fixed Star
of the Nature of Mars, and Retrograde into the burgain, and
the rest of the Planets are under the Earth; so that this Quarter
in general will fill Peoples Heads with Jealousies; some
times mighty talk of a Peace, at another time all silent again
Sometimes much talk of the French making a vigorous Defence
and at another time seeming willing to agree upon any Terms
but trust him not: the old Fox will be a Fox still, tho' if you
strip him of his Skirt and pull out his Teeth, yet the Nature
of the Beast is remaining. Soon after the Ingress, the Sun
meets with a Square of Saturn, and there will happen quarrelling
and uneasiness among discontented Spirits of all sides, and
Trouble and Discontent to some Person of Note. The next

COLEY'S *Astrological Observations*, 1710.

the ascendant passing from a Conjunction to a Sextile of Jupiter, who is Lord of the ascendant, and her Dispositor; shews that the Common People will seem to be more easy, and wait with Patience for a long hop'd for Peace. The Month of April produces some healing aspects, yet the square of Saturn to Mercury first, and then to Mars, will set some fly villains to work, and their Raguery will be apt to be discovered, and they themselves brought to just Punishment. The armies begin to move, notwithstanding the great noise of a peace, since there is no trusting to the word of a proud Tyrant that never kept either Word, Faith, Oath or Promise. In the beginning of May the Sun and Mercury meet with an opposition of Jupiter: And why might there not be some contest about Religion, and the like. I hope when a Peace is concluded the Protestants in all Foreign parts will be remembered, that they may enjoy as well Peace and Liberty in their Religion, which highly concerns their future Happiness, as the Name of a Temporal Peace here, while Dragooning, Blood-sucking Villains are contriving how to cut their throats in cold blood. Some good News from abroad, and some Ships repaired of ready to return home well Laden. There is a Conjunction of Saturn and Mercury in the beginning of June; and this will set some fly Villains on work, and if they have not ware, their Contrivances will cut out work for the Hang-man. The Diseases of this Quarter will be such as will afflict the Neck and Throat, as Quinsies, King-Exul, Impostumes, and such like, with Diseases of the Head, proceeding from a cold Cough, abundance of moist humours, the Patient heavy and dull, subject to a Lethargie, the Reins afflicted, and such like. And thus I shall end this Quarter, with God preserve our most gracious Queen ANNE, and grant her a long and prosperous reign over us: and this brings me to the next, which is

The Summer Quarter

This Quarter takes its beginning at such time as the Glorious Lamp of Heaven the Sun touches the first Point of the Celestial Crab, or Sign Cancer, or the Earth Capricorn, which you please. And now the Creatures having brought forth their Young, and the Fruits growing Ripe, the Days are longest; so that soon after this Quarter commences, the
Days

COLEY's *Astrological Observations*, 1710.

Days will begin again to decline; yet produce most sweet and Fragrant Flowers, very delightful: This happens on the 10 day of June, at 12 h. 30 m. p. M. at which time 26 degrees of *Aries* ascends the Horoscope, and 6 degrees of *Capricorn* Culminates; the *Moon*, *Mars* and *Venus* located in the ascendant, and *Mars* approaching the *Pleiades*; *Saturn* and *Mercury* in the Fourth in *Cancer*; *Jupiter* is located in the Seventh Retrograde, and in opposition to *Mars* his Dispositor. This makes but an indifferent Figure, and things at present seem untoward; some eminent Gown-man under some affliction, if not removed by Death; some Lady afflicted, Solitude is her Companion at present, if not Death in the end. The Conjunction of the *Sun* and *Saturn* in the beginning of July will bring some Contrivance to nought, yet the Trine of the *Sun* and *Jupiter* will heal many Breaches, and the Trine of *Saturn* and *Jupiter* in the middle of the Month, *Jupiter* being become direct, will push things forward towards a General Peace, (which I hope) nay, am almost persuaded will be accomplished in this Quarter, or very near it; and that it may be lasting and durable, I hope the High Allies will take care to settle the ballance of *Europe* on such a Foundation, as may never be in the Power of *France* to shake it, that every Prince may know his own Right, and every Subject live in Obedience under his own Sovereign, enjoying Peace and Liberty, and then the God of all Peace will bless both Prince and People, and *Europe* will flourish again, and her Trade spread it self to all parts, to the enriching of the People and Nations: And thus I end this Quarter, being the Third Order, and enter upon the Fourth and last, which is

The Autumnal Quarter.

WHich this Year begins on September the 12th. at 40 minutes past One in the After-noon, at which time the *Sun* mounts the Sign *Libra* or the *Celestial Balance*, or the *Earth Aries*: Now the *Wood-cock* does appear, and the *Smallpox* leaves us till the *Spring*: Now the Days and Nights are again of equal length, as they were in *March*: This Season also provides us with Wine, to make glad the Heart of Man; at the Ingress we have 23 degrees of *Sagittarius* ascending, and *Libra* again Culminates, as in the *Spring Quarter*; *Venus*

COLEY's *Astrological Observations*, 1710.

near Corleonis in the Eighth, and Saturn and Mars located there in Cancer; the Sun and Moon in Conjunction on the Cusp of the Tenth, and Mercury there also; Jupiter is in the Seventh, in Trine to Saturn and Mars; and if ever we do expect a Peace, now or near this time it will be compleated; but I hope the Truce in July last may accomplish it and this confirm all, ending all Contentions between Princes and Potentates, that poor Men may sleep at quiet, and not be hurried into the Wars to be offered as Sacrifices for the Sins of the Great Contenders: Now I hope the French have their Eyes open, and begin to see how severely they have suffer'd for the Infidelity of a Proud Prince: And thus I end my *Astrological Judgments* of this Year, hoping to tell a comfortable Story in my next, of an established Peace, which God grant us here and hereafter. *Amen.*

The Conclusion.

AND now let *Momus* Carp, and Scold and Jeer,
It is not Criticks Malice that I fear;
The Old Year's past, another is begun,
Here let us look before we take our run:
Peace is no Burthen to a settled Mind,
But the best Purchase, in the end we find.
If we were Kings then we might Rule and Sway,
But as we Subjects are, we must Obey:
So every Common-wealth in every thing,
Do pay all due Obedience to their King;
And so let us with joyful Notes be seen,
To Pray always God Bless Great ANNE our Queen.

He deſires all that ſend to him out of the Country upon Buſineſs of their own, that they would pay the *Postage*, or expect no *Answer* to what they write.

Writing and *Mathematicks* are taught in *Stainford* in the County of *Lincoln*, by *Joſeph Pepper*, with whom *Youth* may be commendably *Boarded* for ſpeedier Improvement.

Artificial Teeth ſet in ſo well, as to eat with them, and not to be diſcovered from *Natural*, nor to be taken out at *Nights*, as is by ſome falſly ſuggeſted, but may be worn *Years* together: They are an Ornament to the *Mouth*, and helps the *Speech*. Alſo *Teeth* Clean'd and Drawn by *John Watts*, Operator, who applies himſelf wholly to the ſaid Buſineſs, and lives in *Raquet-Court*, *Fleet-ſtreet*.

Ruptures or *Broken Bellies* cured with the greateſt Succeſs imaginable: By *Will. Collier*, at the *Bell and Two Naked Boys*, in *St. John's-Lane* near *Hick's-Hall*; and *Truſſes* made of all ſorts with *Springs*, *Joynts* or *plain*, and ſo eaſy, the like are not made, as many by Experience can teſtify. *Persons* living at a diſtance, by ſending an exact *Meaſure* round the *Body*, and which ſide the *Rupture* is on, may be very well fitted. *Women* are alſo cured by his *Wiſe*; he likewiſe makes ſtrait *Stockings*.
